EXPERIENCE

Software Engineer

March 2022 - Present

Autodesk

- Worked on a web platform used to connect over 1 million construction professionals and streamline the bid and risk management process.
- Led initiative to convert 25% of the frontend codebase from backbone to React which increased performance throughout the web platform.
- Worked on maintaining and improving key infrastructure such as elastic search which powered search throughout the entire platform.

Software Engineer

May 2021 - March 2022

EstateSpace

- Developed a web application used by real estate companies to manage over 100 million dollars worth of property assets.
- Developed a payroll system allowing contractors to input hours worked saving the company 250k per year instead of using a 3rd party system.
- Led frontend development of a project allowing users to automate workflows of regularly-recurring processes leading to a decrease in unnecessary managerial oversight.

Software Engineer

June 2020 - May 2021

Construct AI

- Developed a web application used by large construction companies to track expenses, employees, and deadlines.
- Developed project visualization dashboards using React which helped over 200 projects hit their deadlines and budget goals.

PROJECTS

Elevate A/B Testing

bit.ly/ElvateAB

- Built an application listed on the Shopify App store that helps over 2,000 store owners increase revenue with A/B testing.

EDUCATION

Rutgers University

Bachelor of Arts in Computer Science
